

Exakta-System Photography

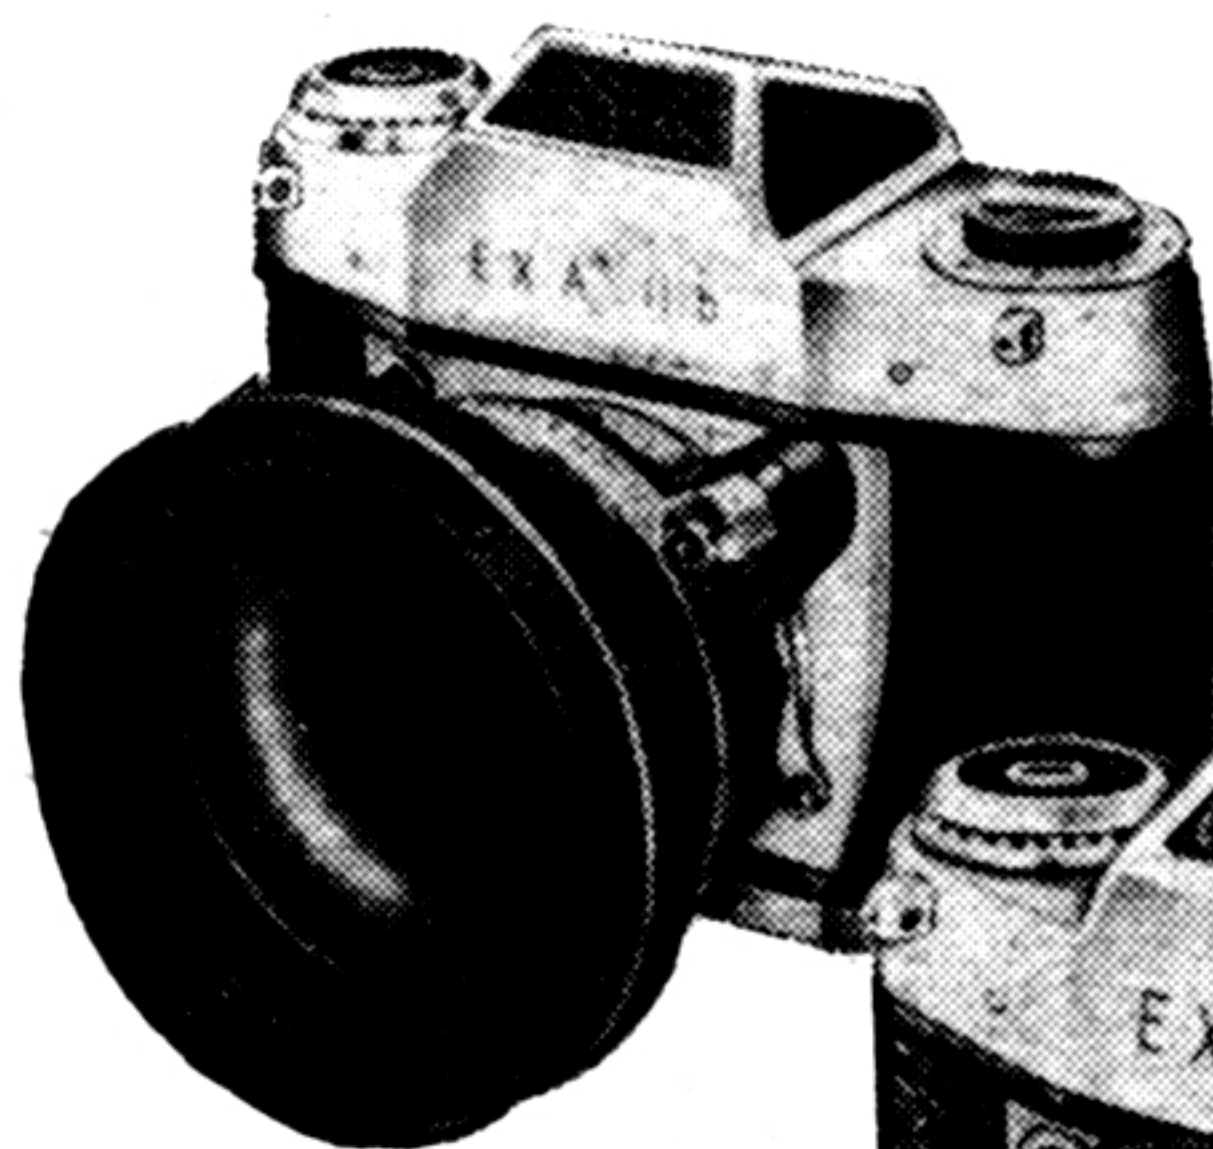

past · present · future

Years of planning and design produced the first single lens reflex system of miniature photography – EXAKTA – and it has never been surpassed in its versatility. How could it be? With three basic cameras, three different viewing systems, 20 lenses and 18 different screens there are over 1000 separate combinations that can be made up of the basic camera alone. Then there are dozens of system designed accessories which permit the user to fulfil any photographic obligation, copywork, reduction macro, micro, studio, commercial, portrait, etc., etc.

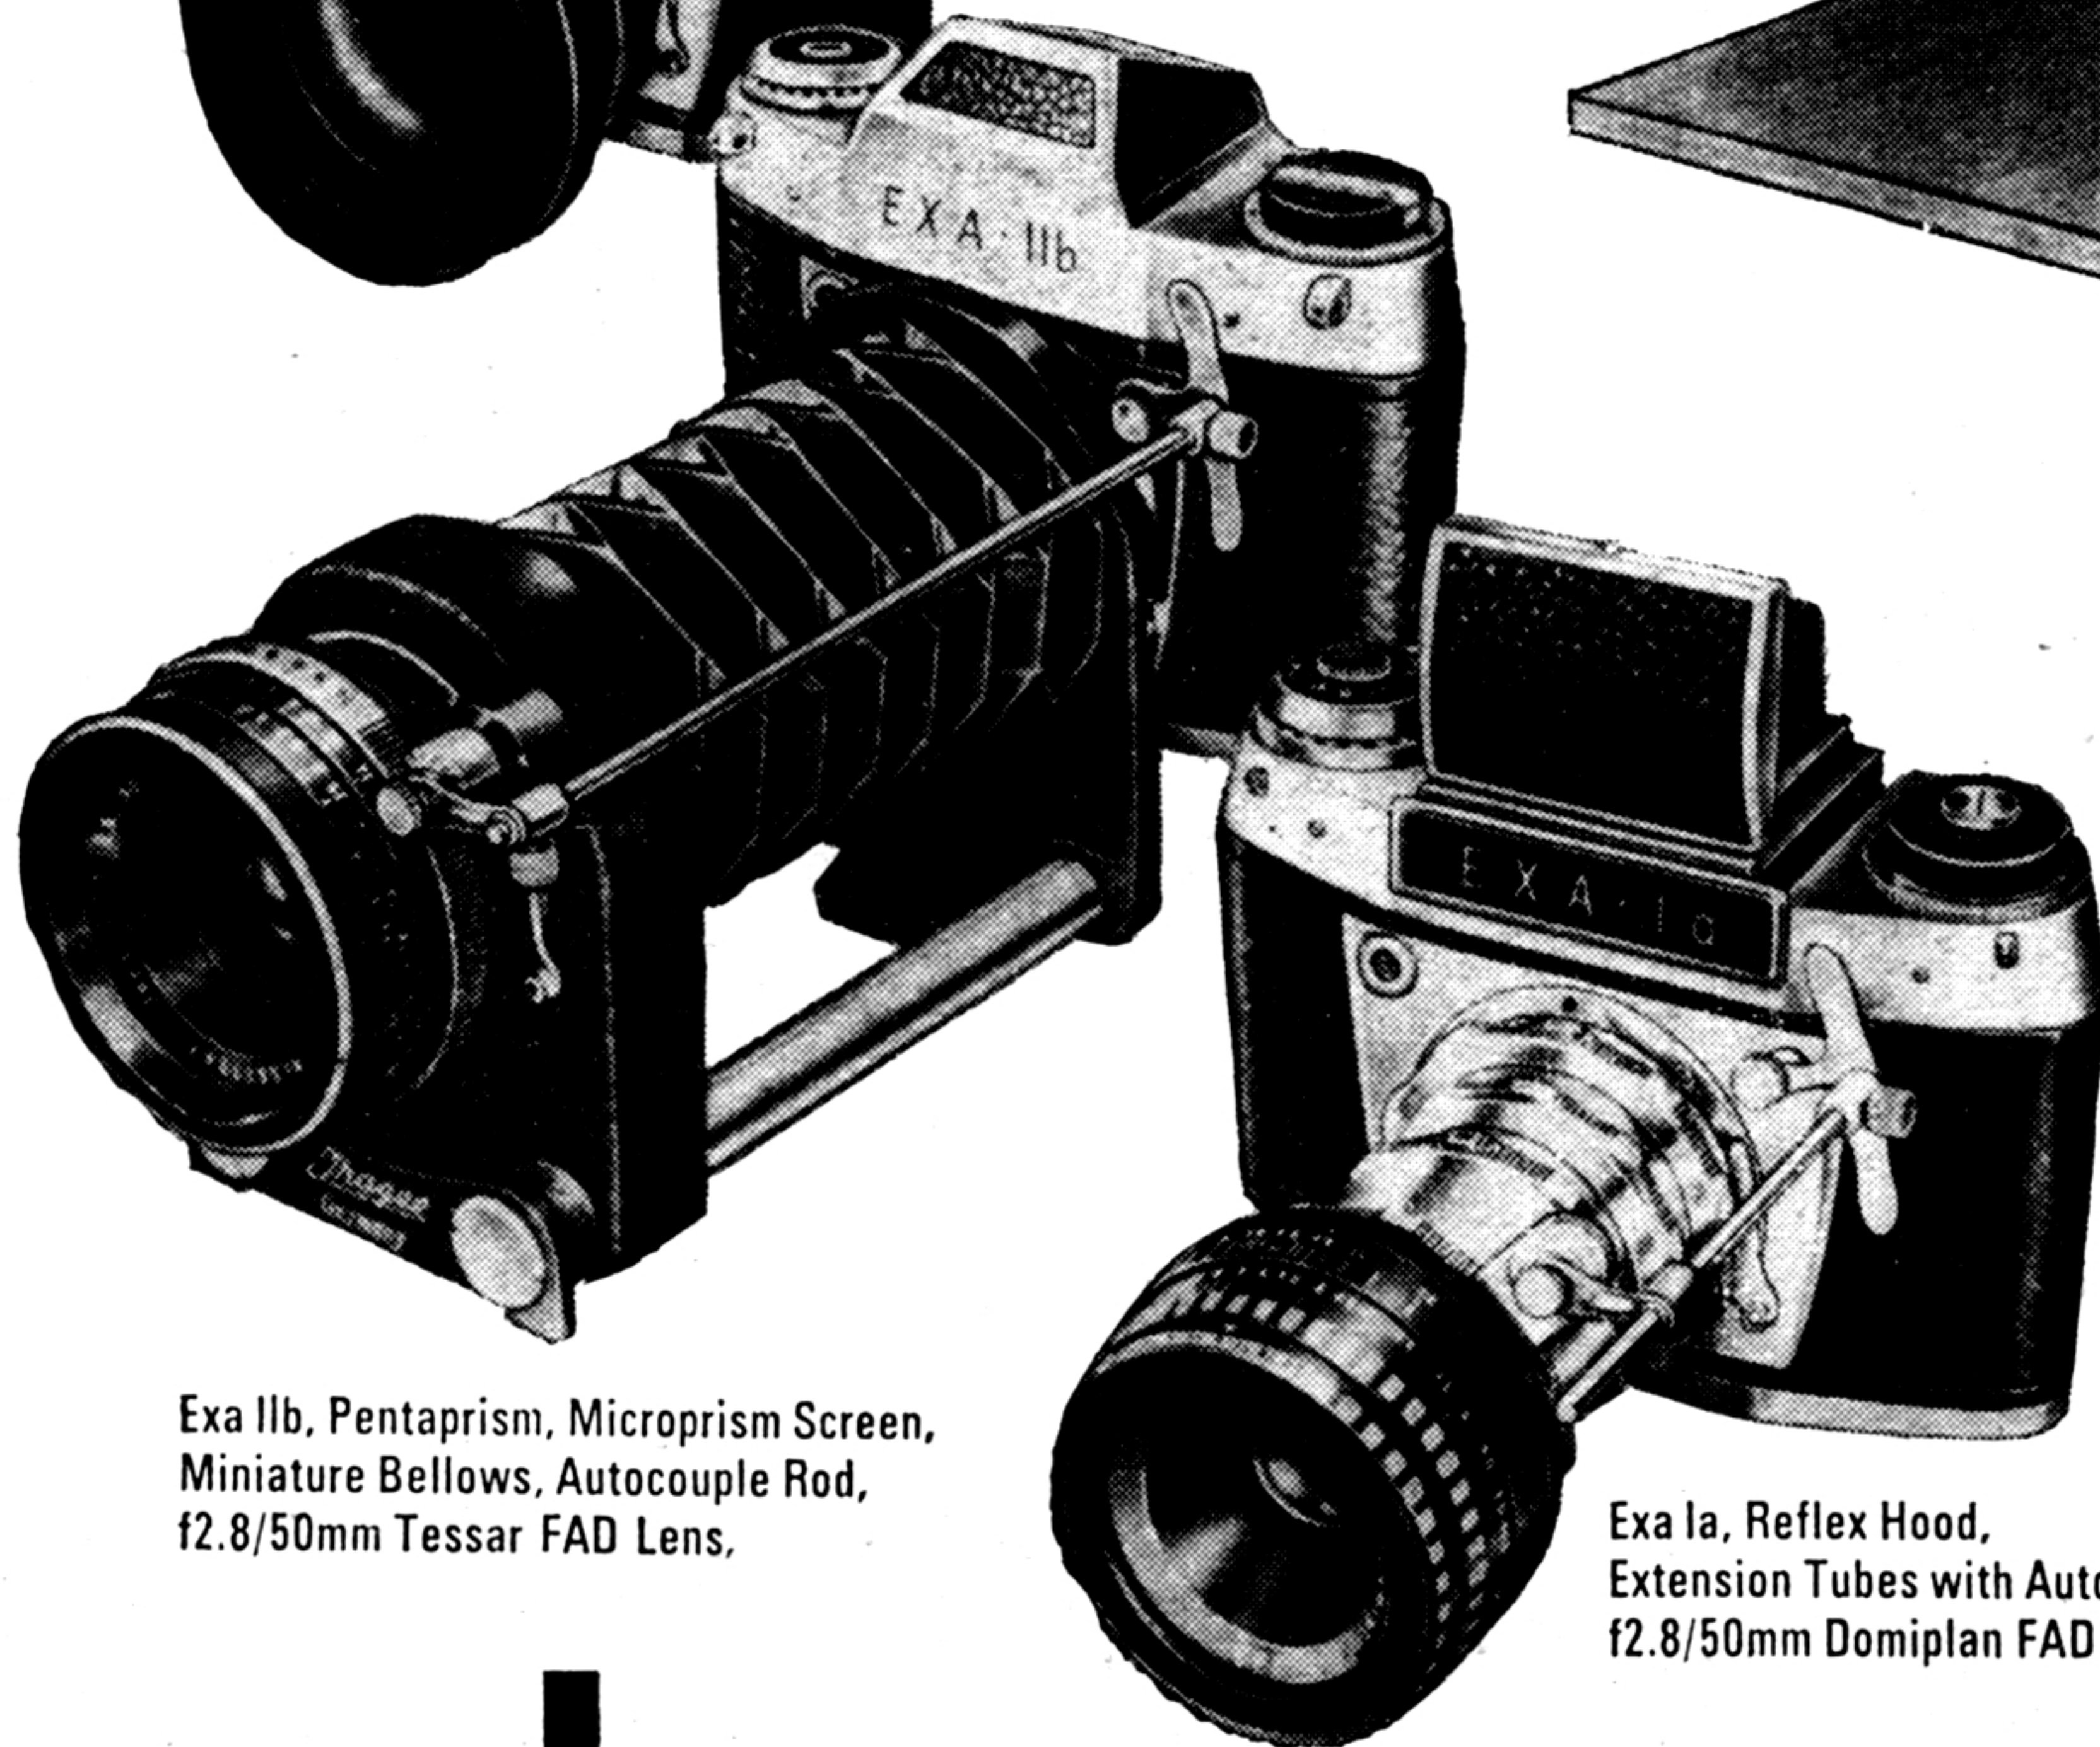

Below you will find a few examples illustrated but for complete details of the EXAKTA system write to our Publicity Dept., at the address given below when we shall be pleased to send you, in full colour, details with prices.

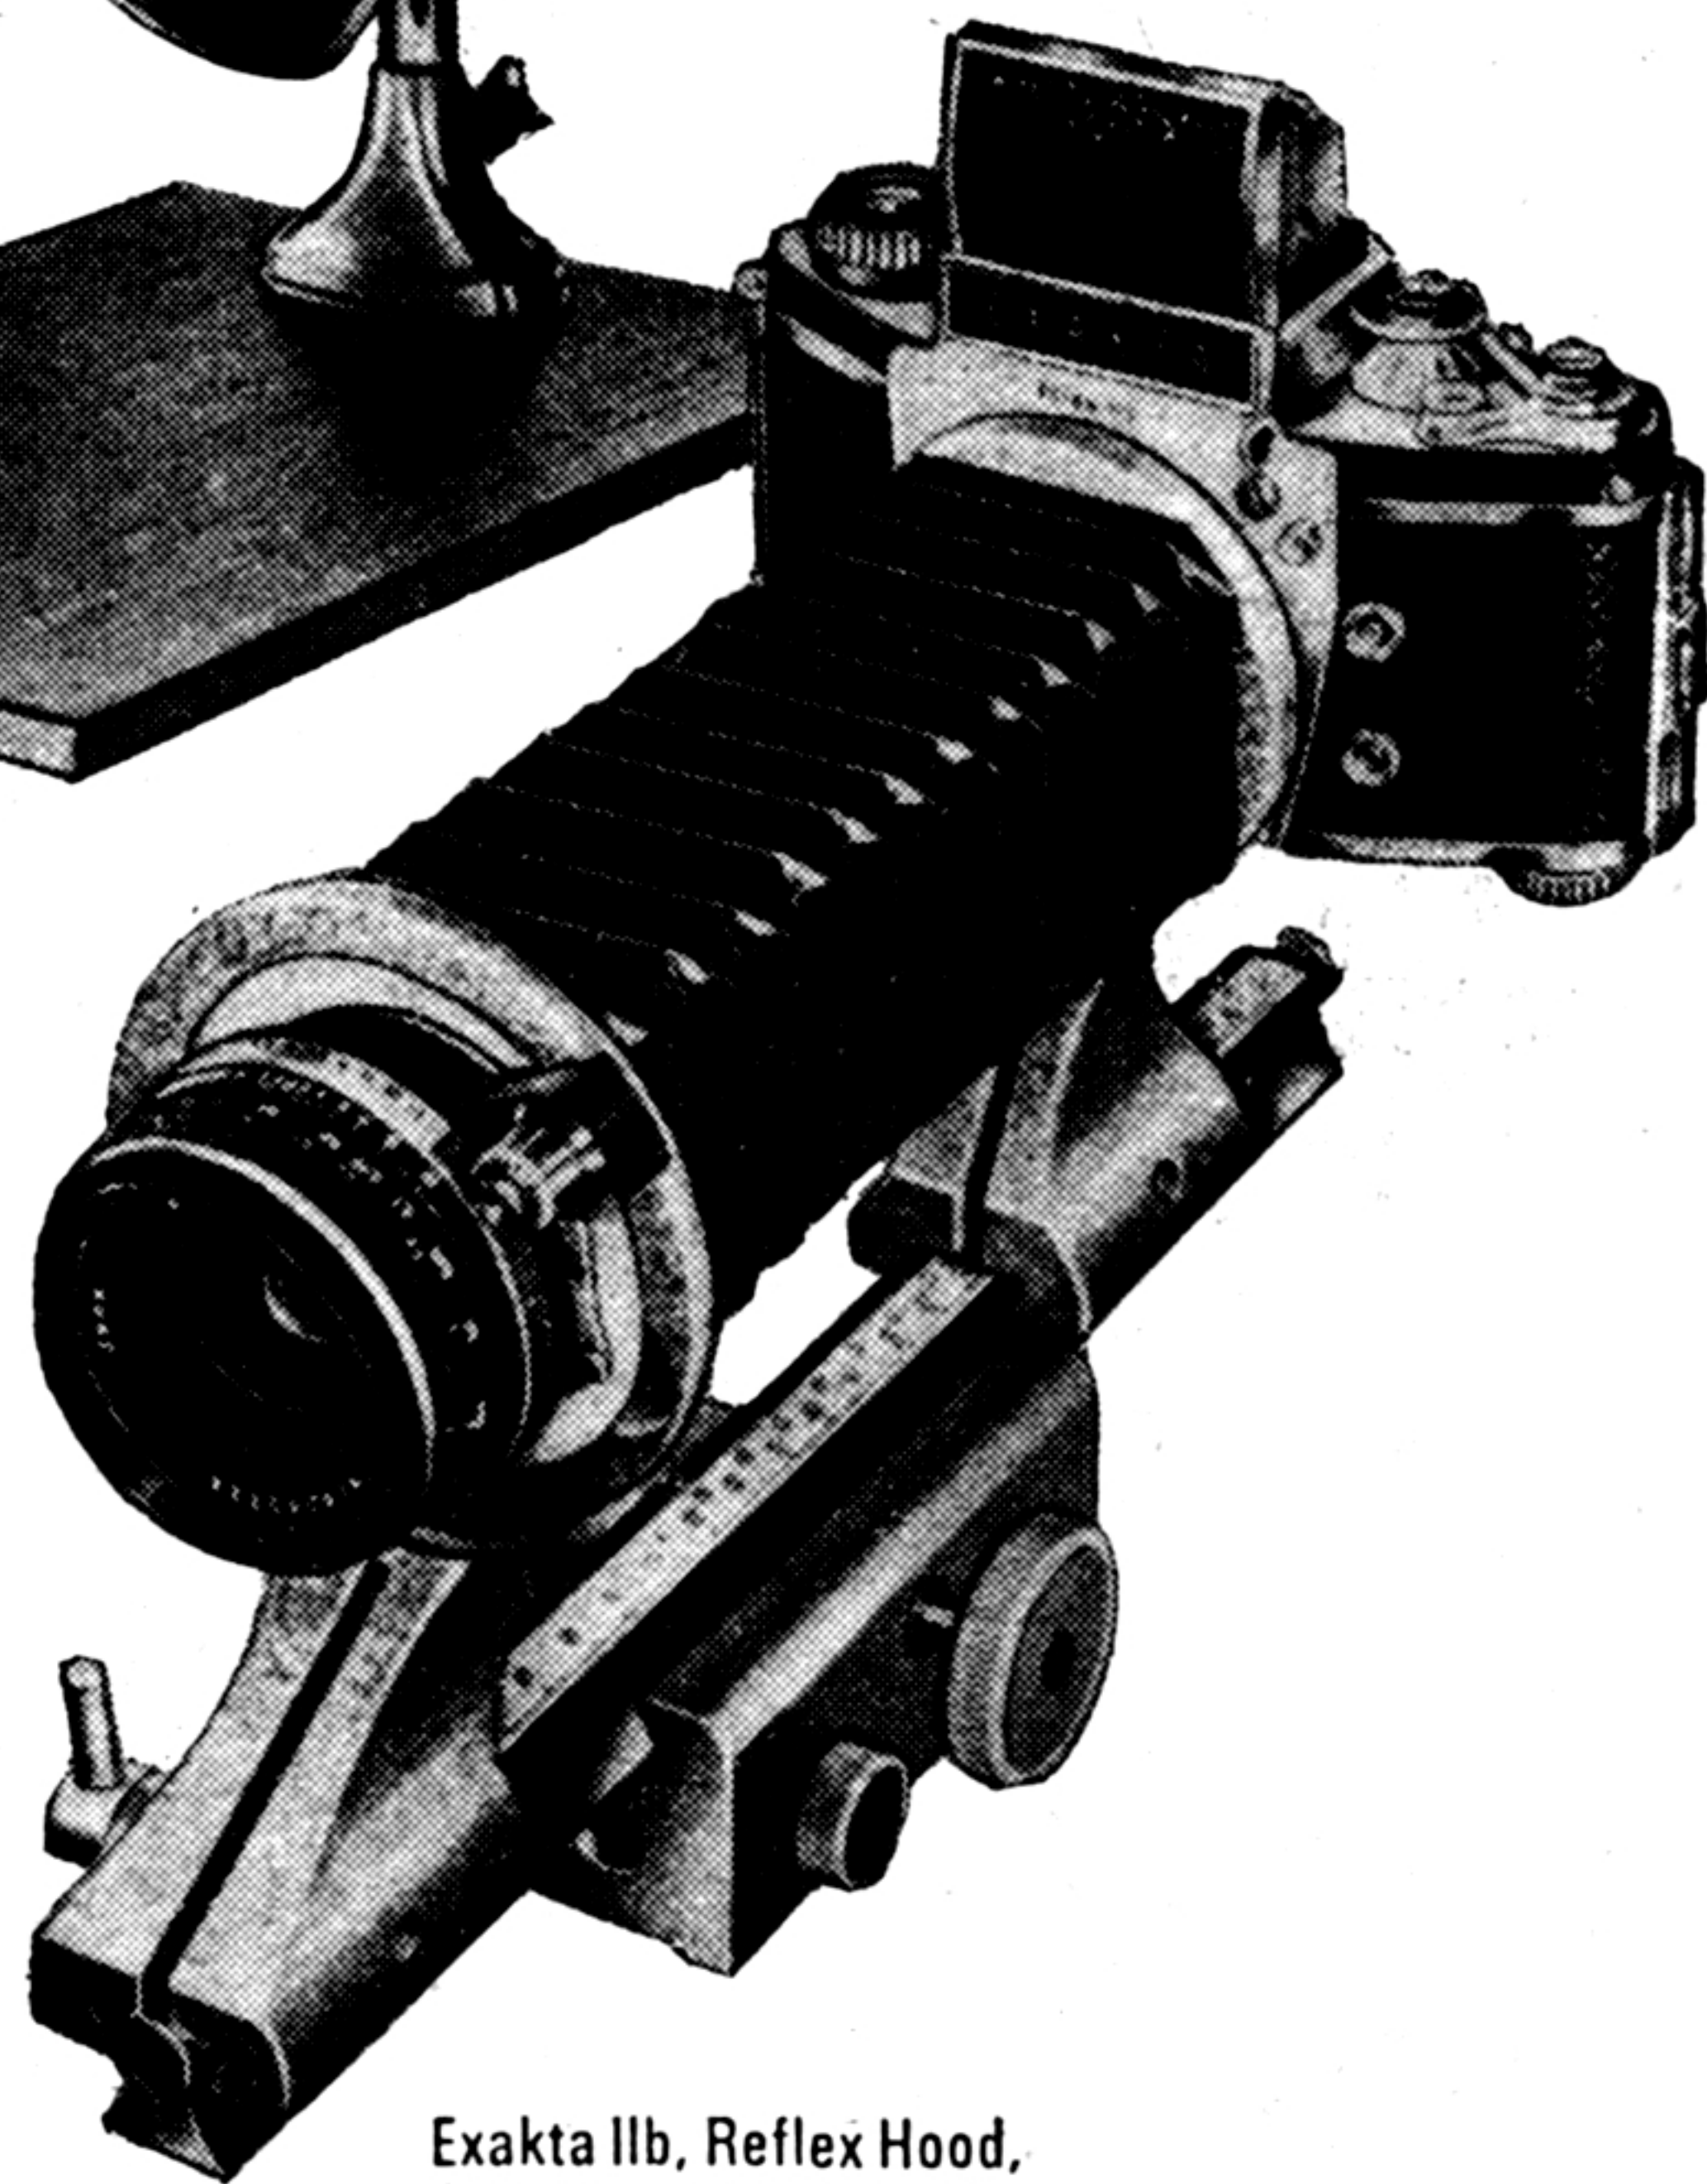

Vielzweck showing Baseboard and Column, Copying Stand, Slide Rail, Exakta IIb, Miniature Bellows, f2.8 Tessar FAD Lens, and Repro Lighting Unit.
