A New Crop of Guaranteed SEYMOUR-REBUILT EXAKTAS

You may want a second Exakta for yourself, either as a "spare" or to carry two different types of film. Or you may want to start off a younger member of your family on the way to Single Lens Reflex photography. The Lady of the House may want her own camera. Why settle for a cheaply made inexpensive new camera when you can get a reliable, fully Seymour-rebuilt Exakta for the same price?

Otto is busy supervising the rebuilding of these cameras. Please select the camera best suited to your needs and give a second choice. Order your Seymour-Rebuilt Exakta right now because stocks are ample and you will get a fine Otto-pampered specimen.

Seymour-Rebuilt, Fully Guaranteed:

Exakta VXIIB, Body \$49.50
Exakta VXIIa, Body \$42.50
Exakta VX, Body \$34.50
Exakta V, Body \$29.50

Shipping: \$1.95 per camera

For complete cameras with lens and finder, write! State combination wanted.

STEINHEIL appoints SEYMOUR'S Exclusive Importers of Macro Lenses

Munich, Germany — An Exclusive Contract for the Steinheil Macro Lenses was signed here between Earl F. Seymour, of Seymour's, Inc., the Exakta Specialists, of New York, N. Y., U.S.A. and H. W. Daehn of Steinheil Optical Works of Munich, Germany. The contract covers the Exclusive Sales Rights in the United States for the Steinheil Auto Macro Quinaron 35mm F2.8, the Steinheil Auto Macro Quinon 55mm F1.9, the Steinheil Auto Macro Quinar 100mm F2.8, and the Steinheil Auto Macro Quinar 135mm F2.8.

The Contract reads in part as follows:

Steinheil is granting to Messrs. Seymour's, Inc., New York, the Sole Agency Rights in the United States for the Macro Lenses.

New York, N. Y. — Seymour's, Inc., of this city, announces the completion of negotiations with Steinheil Optical Works of Munich, Germany, resulting in an exclusive contract covering the Sales Rights in the United States for the well known line of Steinheil Macro Lenses. Simultaneous announcements have been released by Seymour's, Inc., and Steinheil Optical Works.

The Details: The famous Steinheil Macro Lenses (undoubtedly the most highly corrected lenses ever to be released to the public) were headed for total extinction. The cost of manufacture was too high. Increasing Labor Costs and rising costs of the Special Glass Types needed for these extraordinary lenses increased the production costs. Steinheil had arrived at the conclusion that the lenses could no longer be produced at a marketable price level and announced, reluctantly, that production would be stopped.

At Seymour's, we considered this decision a great loss to Exakta owners. They were being deprived of a line of lenses of the highest quality, to say nothing of their versatility. We approached Steinheil, offering to underwrite a new production at a price level which should make it feasible for the manufacturer to cover his cost and markup. Since letters proved inadequate, several trips were made between Munich and New York by both Mr. Daehn of Steinheil and Mr. Seymour.

At last an agreement was hammered out. Seymour's guaranteed the production by placing a firm order, advancing a goodwill payment ten months ahead of delivery and accepting prices which made it possible for the factory to produce the lenses without pricing the lenses out of the market in the United States. Both Steinheil and Seymour's had to "give". Steinheil lowered their original price demands (realizing that they had no selling costs on the production) and we (Seymour's) reduced our mark-up to keep the selling price down.

Discover a New World of Photography with Steinheil Macro Lenses

55mm F1.9 Macro Quinon

What makes this lens so new and different? Well, there has never been a lens like this one! For one thing, it gives you an unbroken focusing range all the way from Infinity through "normal" focusing range to "same-size" image (1:1) to Ultra Close-Up Range of one and one half inches with a magnification of 1.4 to 1 (enlarged!) on the film. And all this CONTINUOUS: no blind spots, no gaps. And, incredible as it sounds, the lens REMAINS fully automatic throughout this amazing range! Next, you do not need Extension Tubes, Close-Up Lenses, Bellows or ANY kind of additional gadget. Whenever and wherever the need for close-up photography arises, you are ready.

You don't even need Exposure Tables, nor do you have to do any figuring: You merely read off the Magnification Ratio and the Exposure, no matter how close you focus. This feature alone makes it the most unique lens ever designed.

The Lens is also ideal for Slide Copying. It lets you copy the entire slide or, if you wish, any part (if you want to crop the Duplicate Slide).

Maybe we have been dwelling too much on Close-Up Photography. Don't get the idea that the Macro Quinon is limited to Close-Up Work. In fact, if you NEVER take a Close-Up Shot, you should buy it because of its incredible correction. Never before has there been a lens of such brilliance, sharpness and color correction. If you are looking for the best-quality automatic lens for your Exakta, get the new Steinheil Automatic Macro Quinon 55mm F1.9.

QUOTE'

(Quotations from Test Report, Mod. Photog. Mag.) "Lucky Exakta owners!" "Superb Lens" Answer to a Photographer's Dream" "A Really Superior Optical System" "Works like a Charm" "(at \$249.50) a Bargain!"

May we add our own findings to these enthusiastic comments of an independent magazine? In all our experience we have never tested a lens of such superior quality. It rivals apochromatic and process lenses in sharpness and clarity of minute detail. Wait till you project your first shot taken with this lens. You have NEVER seen anything like it!

Equally impressive in quality and versatility are the other 3 members of the Steinheil Macro Family:

35mm F2.8 Macro Quinaron
Focusing Range: Infinity to 3/16" (!)

100mm F2.8 Macro Quinar
Focusing Range: Infinity to 9"

135mm F2.8 Macro Tele Quinar
Focusing Range: Infinity to 18"

Price, per Lens, \$159.50 plus \$3.95 for the Shade,
\$4.95 for the Case and \$1.25 Shipping Charges.
(Shipping Charges for 2 or more Lenses: \$1.65)

Series VII Drop-in Filters, each 4.95
54mm Rotating Custom Polarizer 9.50
Series VII Filter Adapter. 4.95

All Lenses take 54mm Accessories

Accessory Thread	54mm	54mm	54mm	54mm

How you can obtain them...

The Steinheil Macro Lenses will be uniformly priced as follows:

Each Lens \$159.50 plus \$3.95 for the original Shade and \$4.95 for the Case. Shipping Charges will be \$1.25 for one lens or \$1.65 for two or more lenses.

Delivery will begin in November 1968. At first, quantities will be small and the demand will exceed the supply. In fairness to all customers, we are taking orders which we will fill in the same sequence as we receive them.

With each order we require a deposit of \$55.00 per lens. To compensate you for your loss of income on this deposit we permit you to deduct "interest" at the rate of 6% per annum when you send the balance just before shipment. (Please note: This pertains to the Steinheil Macro Lenses only. Also note: No cash interest paid on orders cancelled before shipment). When your order is ready for shipment, we will notify you and give you the correct figure for the balance less accrued interest.

SERVICE

When did you last have your Exakta cleaned and re-lubricated? You can get a great deal of additional mileage out of your Exakta if you take care of it. A new camera will usually not require re-lubrication for about 2 years. Older cameras should be "washed" and re-lubricated every two years. The old lubricant usually cakes up (combining with the dust that seeps in) and after a while the lubricant becomes an abrasive. If you let it go too long, your gears will be in sad shape. It's cheaper to give your Exakta regular service. We recently announced our new "package" service which consists of cleaning out of old lubricant, re-lubricating, checking fast and slow shutter speeds and checking focus. Let us take care of your camera and it will take care of you.

EXAKTA REPAIRS
 As Exakta Specialists we are fully equipped to handle all repairs on Exakta cameras, lenses and accessories. Original parts and factory recommended methods are used. Seymour-repaired Exaktas are guaranteed for one whole year. Want an estimate first? Sure thing. Send the equipment, attach a tag to it and mark it "Estimate Only." No obligation. Sometimes people write and ask whether we repair only cameras bought from Seymour's. Perish the thought! All Exaktas are our babies, regardless where purchased. Our charges are reasonable. Repair charges are based on the time consumed and experts don't have to fumble around trying to find a way to repair a camera. Don't forget that we LIVE with Exaktas: we know them inside out!
