Color Services

Ever since we started the showroom exhibit of the beautiful giant color enlargements of Mr. Seymour's slides, customers kept asking us whether we could accept orders for handmade color enlargements.

On a limited scale we can now accept orders for this type of quality work.

Our finest hand made giant enlargements for display or competition purposes, exactly as displayed in our showroom, 16 inches by 20 inches large. are for your very best slides. Individual attention. No Rush Orders.

16" x 20" Competition Type Giant Color Enlargements.

First print (includes Inter-Negative, fully masked) unusually low priced for this quality, \$29.50 + 1.75 Shipping. Additional enlargements from same negative, each \$19.50. Mounting on heavy board, \$2.00 per enlargement. Dust Spotting, color matched, \$2.00 per enlargement Matte Finish (prints must be mounted) \$1.00 each. If your order for 16 x 20 prints is for \$100 or more, you qualify for a special courtesy discount of 10%.

11" x 14" Home Display Enlargements.

Excellent work: do not let the low price fool you!

One 11 x 14 Color Enlargement \$9.50.

Three 11 x 14 Color Enlargements \$25.00.

Six 11 x 14 Color Enlargements \$45.00.

Ten or more: \$6.85 each.

Above quantity prices for same or assorted slides.

Mounting on heavy board \$1.50 each.

Dus spotting, color matched (by hand) \$1.00 each.

Matte Finish \$1.00 each.

Shipping 11 x 14 Prints: \$1.00 for total shipment of one to 11 prints. On orders for 12 or more 11 x 16 prints we pay shipping.

8" x 10" DeLuxe Custom Enlargements.

Now, for the first time, you can have real quality color enlargements which are inexpensive enough to allow you to have enlargements made of ALL your good slides. Use them to give as gifts, or to hang (framed or unframed) in your den, office or living room. Use them as sales tools, as teaching aids — there is no limit to the imaginative use of these 8 x 10 Custom Enlargements.

First 8 x 10 Enlargement per subject \$6.50.

(Please note: Minimum Color Order \$10.00).

Additional 8 x 10 Enlargements (same subject) 3.95 each.

Ten or more 8 x 10 Enlargements (same subject) 2.95 each.

Mounting on heavy board \$1.00. Matte Finish 50¢ each.

Large Orders:

Ten (different) 8 x 10 Enlargements \$4.95 each.

All Orders must be Accompanied by Payment in Full. Case comes packed with camera and is mandatory. No Trades at this Special Price.

SERVICE

When did you last have your Exakta cleaned and re-lubricated? You can get a great deal of additional mileage out of your Exakta if you take care of it. A new cameras will usually not require re-lubrication for about 2 years. Older cameras should be "washed" and re-lubricated every two years. The old lubricant usually cakes up (combining with the dust that seeps in) and after a while the lubricant becomes an abrasive. If you let it go too long, your gears will be in sad shape. It's cheaper to give your Exakta regular service. We recently announced our new "package" service which consists of cleaning out of old lubricant, relubricating, checking fast and slow shutter speeds and checking focus. Let us take care of your camera and it will take care of you.

Best News Ever: Steinheil Macro S Lenses now available for immediate delivery!

What makes the Steinheil Macro S Lenses so new and different? For one thing, they give you an unbroken focusing range from Infinity through "normal" focusing range to Ultra-Close-Up Range. Note the word "unbroken." It means that the focusing range is continuous: no blind spots, no gaps. And, incredible as it may sound, the lenses REMAIN fully automatic throughout their amazing focusing range. Next: you no longer need Extension Tubes, Close-Up Lenses, Bellows, or ANY kind of additional gadget. Just leave your Macro S Lens on your camera: whenever and

wherever the need for close-up photography arises, you are ready. And all this in addition to the "normal" function of the lenses for photography at conventional distances.

You do not even need Exposure Tables, nor do you have to do any figuring: you read the Magnification Ratio and the Exposure Factor right off the lens barrel, no matter how close you focus! This feature alone makes the Steinheil Macro S Lenses the most unique lenses ever designed.

Perhaps we have been dwelling too much on

Close-Up Photography. Don't get the idea that the Steinheil Macro S Lenses are limited to Close-Up Work. In fact, even if you NEVER take a close-up shot you should choose them because of their almost incredible optical correction. Never before have there been lenses of such brilliance, sharpness and color correction. The lenses are 100% free from internal reflection, flare or stray bounce light. If you want the ultimate in quality without compromise, get the new fully automatic Steinheil Macro S Lenses for your Exakta.

"QUOTE". Modern Photography Magazine tested the 100mm Macro Quinar: "Lucky Exakta Owners!". "Superb Lens". "Answer to a Photographer's Dream". "A Really Superior Optical System". "Works like a Charm". "(at \$249.50) a Bargain!"

May we add our own findings to these enthusiastic comments of an independent magazine? We have never, in all our experience, tested lenses of such superior quality. They rival apochromatic and process lenses in sharpness and clarity of minute detail. Wait till you project your first shot taken with any of the Steinheil Macro S Lenses. You have NEVER seen anything like it!

55mm F1.9 Macro S Quinon

Focusing Range: Infinity to 1½"

100mm F2.8 Macro S Quinar

Focusing Range: Infinity to 9½"

135mm F2.8 Macro S Tele Quinar

Focusing Range: Infinity to 18"

All Steinheil Macro S Lenses are fully automatic
Glass Type: Rare Earth. Coating: Permanent, Anti Reflex.

Color Slide Duplicating Service

One of the most frequent requests from customers is: "I have a number of very fine slides and I want the best possible duplicates. I am not set up to do my own duplicating. Can you help?" Well, now we can. We can now supply professional high quality duplicates. Single Duplicates or quantity work of thousands of exact duplicates, we are now ready to serve you. Minimum Slide Duplicating Order \$10.

First 35mm Color Duplicate, cardboard mounted, \$1.00.

Second to ninth Duplicate, same subject, .60 each.

Tenth to 24th Duplicate, same subject, .40 each.

Combination Orders:

One Duplicate each of 12 different slides, total \$10.00.

Five Duplicates of each of 12 different slides, total \$29.50.

Ten Duplicates of each of 12 different slides, total \$39.50.

Quantity Orders:

100 Duplicates, same slide, total cost \$19.95.

5,000 Duplicates, same slide, total cost \$495.00.

(The \$495.00 price includes imprinting of mounts).

Special Display Sets.

Ideal for Museums, as sales tools for salesmen, for Hotels and Motels, for re-sale or as premiums. Set also makes ideal Christmas-Card-and-Gift.

Each Set consists of 6 (different) duplicates of your slides in Plastic Display Holder (all slides visible at a glance). Imprint on Holder. Imprint on individual cardboard mounts.

For small-quantity users:
250 Sets at \$1.95 per set.

For large-quantity users:
5,000 Sets at 97¢ per set.

The six slides in individually imprinted cardboard mounts are hand-inserted in the imprinted plastic display holder, then sealed in clear polyethylene. Send for sample set as described under heading "Tell me, Mr. Seymour". Sample Set contains six slides by Mr. Seymour and is priced at \$2.95 postpaid.

Responsibility for Customer's Originals.

Professional care will be given to customer's originals while in our possession. However, in case of loss or damage, our responsibility is limited to replacement value of the unexposed sensitized material.

Steinheil 135mm F2.8

Fully Automatic Auto Tele Quinar

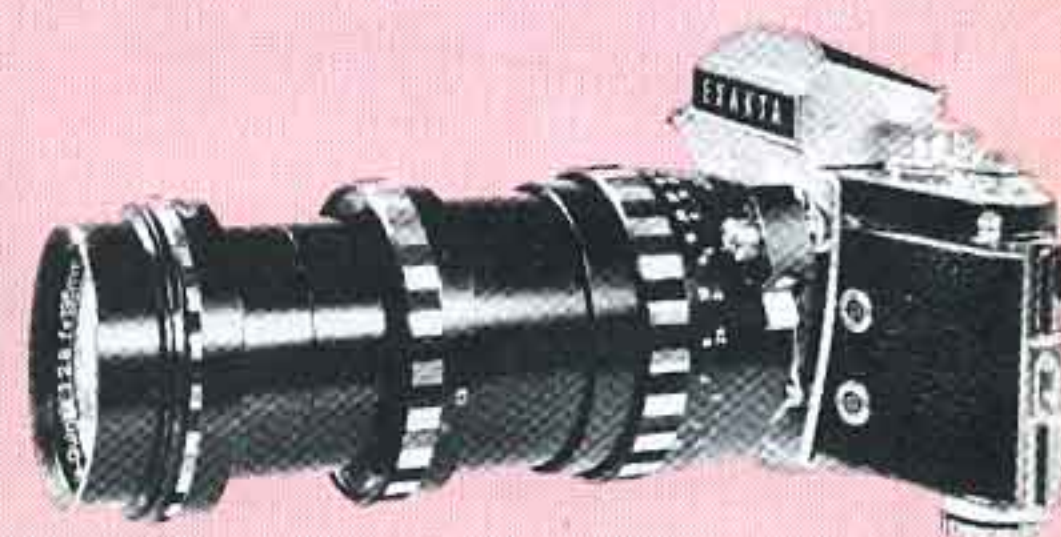

After an absence of over six months, the very excellent Steinheil 135mm F2.8 Auto Tele Quinar is again available for immediate delivery. Word-of-Mouth Recommendation has made this lens the most popular 135mm Telephoto Lens.

Its reputation is well deserved! It is a truly excellent lens, both optically and mechanically. The 100% color correction brings out all colors in their original glowing beauty. The Resolving Power is close to the theoretically possible maximum and guarantees razor sharp pictures with clear detail and crisp contrast.

The lens is beautifully designed. It is only 3 inches long! It comes in a non-glare ebony black finish. You can switch from fully automatic operation to "Manual" by merely pushing a button. The lens has an In-Line Shutter Release in an all-metal Automatic Activator Housing. A true Steinheil Quality Lens!

135mm F2.8 fully automatic Steinheil Auto Tele Quinar Seymour-priced at only \$69.50. Original Steinheil Screw-in Shade \$3.95. DeLuxe Case \$4.95. Shipping 95¢

SPECIAL COMBINATIONS

Steinheil Announces Two New Fully Automatic Exakta Lenses

When a lens bears the name Steinheil, it needs no build-up. Even though the Culmigons and Cassarits are not in the same ball park as the Macro-S-Quinons, they must be better than average if they pass the quality standards of Steinheil. And, a fully automatic Steinheil Lens for less than \$45 is Bargain!

Steinheil Fully Automatic 35mm F3.5 Auto Culmigon.

This Sixty-Five Degree Wide Angle Lens focuses from Infinity to 2½ feet. The In-Line Shutter Release has an Auto/Manual Switch. Ultra compact in size, the lens is styled in two-tone chrome-and-black. It takes standard 49mm accessories.

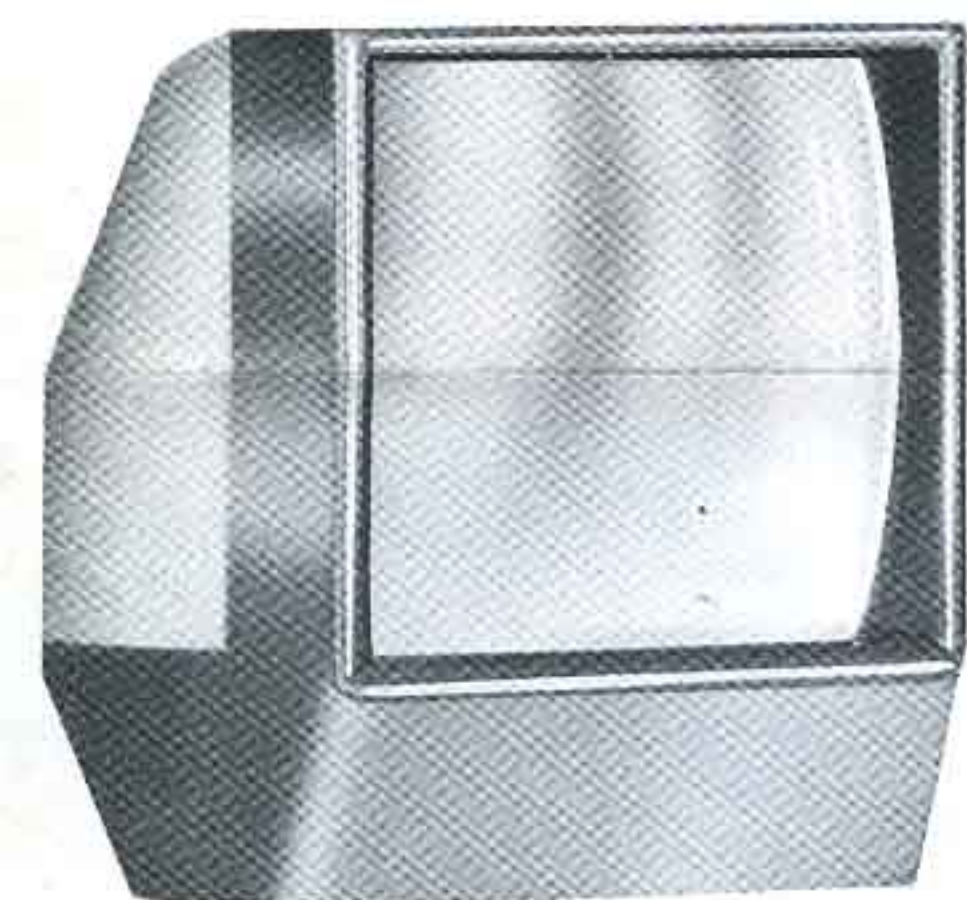

Steinheil Fully Automatic 35mm F3.5 Auto Culmigon Seymour priced at only \$44.50 + 95¢ Shipping. Original Steinheil Shade \$3.95. Case \$3.95. Filter Adapter \$4.50.

Steinheil Fully Automatic 100mm F3.5 Auto Cassarit

This medium-range Automatic Telephoto Lens is well suited for moderate distance, and excellent for portrait work. The In-Line Shutter Release has an Auto/Manual Switch. Small in size, styled in two-tone chrome-and-black. It takes standard 49mm accessories.

Steinheil Fully Automatic 100mm F3.5 Auto Cassarit Seymour priced at only \$44.50 + 95¢ Shipping. Original Steinheil Shade \$3.95. Case \$4.95. Filter Adapter \$4.50.

Special Combination Deal: Buy both of the above lenses and take 10 per cent off the low Seymour prices of the lenses, shades, cases, and filter adapters. Shipping for both: \$1.25.

Betta-Vue Illuminated Hand Viewer

Takes all 35mm Slides, also half-frame and Super Slides. Shaped like a miniature TV set. Comfortable Magnifying Viewing Screen. Light goes on automatically when you insert the slide and goes out when you remove the slide. Battery operated, the Betta Vue Slide Viewer lets you carry it with you wherever you want to show off your slides.

Betta-Vue Slide Viewer \$2.95 + 35¢ Shipping.

Set of Batteries free with each Betta-Vue.

Buy several for small gifts: Three for \$7.85 + 45¢. Six for \$13.75 + 65¢.

Quality Wide Angle Lens is offered at Low Price

Enna's new 28mm F3.5 Ennalyt is a 7-Element Ultra Sharp Wide Angle Lens. If you can live without the automatic feature on a wide angle lens, you have discovered a treasure. This lens, with positive preset diaphragm, is constructed on a Retrofocus Optical Formula which guarantees a distortion-free, wire sharp wide angle picture, free from curvature or loss of corner sharpness. A fabulous buy. A Quality Instrument. Seventy-nine Degree Wide Angle! And the Ennalyt doubles as a Macro Lens because it focuses as close as 6 inches from the lens! Highly recommended.

Enna 28mm F3.5 Ennalyt Wide Angle Lens, Seymour priced at only \$39.50 + 95¢ Shipping.

Filter Adapter 52mm \$4.50. Lens Case \$3.95.

Attention Owners or Prospective Owners of BTL Systems!

Schacht Optical Works, third largest German Lens Manufacturer, the ingenious designers who gave us the Travemat Behind-the-Lens Exposure Metering System, bring you an equally brilliant solution to the problem of matching automatic lenses to the BTL System (Travemat or Examat). The solution: Now the diaphragm is manual, now it's automatic!

How? Like this: Unlike other automatic lenses, the Schacht "BTL" Automatic Lenses have diaphragms which actually respond when you turn the diaphragm control ring. You follow the needle in the BTL System. When it is centered (that is, when your exposure is correct) you give the front ring a quick twist and, presto, your lens is wide open for easy viewing and focusing. The lens remains wide open until you trip the shutter. Then (and then only) it closes down to the exact F/Stop which your BTL meter selected for correct exposure.

Clever? We'll say it is!

But a clever construction is not enough to assure good pictures. A high grade Optical System is equally important (or even more important). In the Schacht "BTL" Automatic Lenses you get both! The sharpness of these lenses is truly amazing. The Optical Formula is an improved Tessar type which makes use of the very latest breakthrough in rare earth optical glass.

These lenses can be used without the BTL System with equal ease. We would like to enable every one of our customers to have one or both of these lenses and have slashed the price — and we do mean slashed!

Brand new 90mm F2.8 Schacht "BTL" Automatic Travemat Seymour Special \$39.95. Case \$3.95. Shipping 1.25.

Brand new 135mm F3.5 Schacht "BTL" Automatic Travemat, Seymour Special \$44.25, Case \$4.35. Shipping \$1.25.

New famous Rokunar 200mm Automatic Lens easily converts to automatic 400mm Lens

The 200mm F3.9 automatic Rokunar is one of the finest Telephoto Lenses we have ever offered. It renders unbelievably sharp fine detail, beautiful true-to-life glowing colors and far-above-average crispness and contrast. Easily hand held, beautifully balanced. A true Rokunar Lens in every respect.

Rokunar Lenses (of "Sharp-as-a-Rokunar" fame) are well known to professionals for their optical quality. The name "Rokunar" automatically guarantees top quality, sharpness and color correction. Originally priced out of reach for most amateurs, these excellent lenses are now offered at Seymour prices which make them available to all Seymour Customers.

Third Generation Ultra Fast Lens

The original 85mm F1.9 Super Coligon was a very good sharp speed lens. Shortly after the first production the manufacturer improved the optical design noticeably. The second production of the 85mm F1.9 Super Coligon was an even better lens. And now — the third generation! New glass type (rare earth) and latest computer-derived lens configurations resulted in an unbelievably brilliant lens.

There are no gimmicks on this lens. The diaphragm is not automatic but has a pre-selector which makes it nearly as easy to use as an automatic one. Besides, you will probably use this lens mostly at its full light gathering potential of 1.9.

The lens serves many purposes, all of them equally well. First and foremost, it is a superb portrait lens. Secondly, a medium telephoto lens. It is virtually indispensable for sporting events, especially indoors. Theater work, of course. And candid shots of people, especially children. Animal portraits, too. And you will think of many more types of pictures which seem to have been waiting for this excellent high-speed medium focal length lens.

Your third-generation Super Coligon is waiting for you. Send for it right now!

85mm F1.9 preset Super Coligon for Exakta \$44.50 plus \$4.95 for the Case. Shipping \$1.25.

Tell me, Mr. Seymour . . .

"Tell me, Mr. Seymour, how come you know so much about the Exakta?" I usually answer this question by pointing to the many color enlargements which cover the walls of our showroom. "Did YOU take all of these, Mr. Seymour?" It seems that people are impressed and hundreds of customers have asked me for duplicates of my original slides. So — I finally yielded and made six slides available to my friends and customers. I will add more subjects from time to time. The first six are now ready:

Series 1, Slide 1: "Oriental Bazaar".

A study of light and shadow. A ray of sunlight steals into the crowded oriental market, spotlighting the wares (mostly age-old metal vessels) against a background in deep shadow. A few bolts of silk supply bright color accents.

Series 1, Slide 2: "Holy City".

Mysterious, ageless, the spirit of the Old City of Jerusalem is captured in a single picture. You are looking through a dark arch at a sunlit scene. Thousand-year-old stones form the background. The smoke from an oriental brazier adds to the feeling of mystery. Arabs, with their picturesque headdresses, walk about. A man and a woman stand next to the wall of greenish-brown stones. The silhouette of a beggar woman breaks into the arched frame around the light part of the picture.

Series 1, Slide 3: "Gossip"

Backyard fence gossip was never like this. Two old Arab women gossip in front of an old billboard whose bills have succumbed to the ravages of time. The wall must have had hundreds of coats of paint or whitewash. Three children play, and a street vendor offers his wares (whatever they are) without paying any attention to the gesticulating old women. The right part of the picture is in shadow, showing a few shoppers in quest of bargains.

Series 1, Slide 4: "Gnarled Tree".

While slides 1, 2, and 3 were taken on my trip to the Middle East, slides 4, 5, and 6 are a tribute to the Arizona Desert, taken during my camera trip to Tucson. Slide 4 shows an old tree in Sabino Canyon. It is doubled up like an old woman, its "top" actually reaching the ground. Brilliant sunlight hits the bark, bringing out the texture in almost three-dimensional realism. A rugged mountain in the background and just a triangle of blue sky complete the composition.

Series 1, Slide 5: "America, the Beautiful".

The Arizona Desert at its most dramatic best. Windswept white clouds in a blue, blue sky. In the foreground a few cactus plants tenaciously clinging to the shallow soil covering a rock jutting out against the background and sky. A mountain across the valley serves as backdrop, adding depth to the picture. If this does not make you want to visit Arizona, nothing will!

Series 1, Slide 6: "Sunset".

A giant Saguaro (say: "sawaro") cactus is silhouetted against a cloudy late-afternoon sky. The colors range from purple to pink to yellowish-red. The foreground is in deep shadow. The giant saguaro is black against the still-light sky. The saguaro stands like a man with his hands raised high. Trees and bushes, dwarfed by the saguaro, form an interesting black lace against the sinking sun.

You may order single slides for \$1.00 each or the entire Set of Six Slides for \$3.00 postpaid. All slides are cardboard mounted, ready for projection. The Set of Six comes in a plastic holder, sealed in clear polyethylene. (With every set of 6 slides I will give you the \$2.95 Betta-Vue illuminated viewer for only \$1.00).

Hooded Reflex Finder

Are you Wasting Half the Versatility of your Exakta?

If you are using your Exakta ONLY with the Eye-level Prism, you are literally wasting half its versatility. The Hooded Reflex Finder is much more than a "Waistlevel" Finder. Of course, it is a waist-level finder. And a right angle finder. And a low angle finder. And a high level finder. And a sports finder. And a straight-on finder for copying and Close-Up Work. And a "sit-down" finder for photomicrography. And more.

For unobtrusive photography you use the Hooded Reflex Finder at Waistlevel. Sneak a quick look to focus. Sneak another look to frame your shot — Shoot!

For sneak-up right angle photography you point your lens one way but look into the finder at right angles to your lens. Sounds strange, but it's true. Works with vertical shots. Five minutes practice and you are the James Bond of the Camera.

For extreme low-angle shots the Hooded Reflex Finder saves you from lying flat on your stomach. Even if your camera is on the ground, you look into the finder from a comfortable height. A small flower, an insect on a blade of grass, or dramatic shots from a gnat's eye view — easy enough; but only with the Hooded Reflex Finder!

What's this bit about "High Angle" Shots? Suppose you want to photograph a parade but you are way back in the crowd. Just hold your camera, upside down, way above the heads of the crowd, look up into your "Waistlevel" Finder and photograph the parade to your heart's content! Shoot over walls, too. Are you beginning to see how versatile your camera will become with the addition of a Hooded "Waistlevel" Finder?

We're not half through! The Model C Hooded Finder also has a Sports Type Frame Finder. Virtually indispensable for fast-moving Sports events, especially races (car, horse, track).

Did you ever try to use your camera with the Eyelevel Finder for copying or close-up work when your camera is mounted with the lens facing down? Takes some acrobatics, doesn't it? With the Hooded Finder you look straight into the finder, and focusing and framing is done with the greatest of ease.

Hooded Reflex Finder

- Model C
- Fold-down Metal Hood
- Direct Sports Finder
- Captive Finegrain Groundglass
- Visolette Light-Gathering Lens
- Magnifier for Critical Focusing

We really want everybody to enjoy the use of the Hooded Reflex Finder. That is why we have put it on Special Sale:

Original Ihagee Model C Hooded Reflex Finder with Captive Finegrain Groundglass and with Fold-Away Magnifier for Critical Focusing during this Special Sale, Seymour priced (brand new, of course) \$8.95 plus 65¢ shipping.

Finder Case (takes regular Ihagee Prism, too) \$2.95.

28mm F2.8 Fully Automatic SOLIGOR Wide Angle Lens.

Leave it to Seymour's-Exakta to bring you the unusual. Chances are, you have heard about this wide angle lens of truly unusual characteristics: Ultra Wide Angle, Ultra Fast Speed, Sharp from Corner to Corner, free from the annoying curvature usually found in extreme wide angle lenses. But — it was not available in Exakta mount!

Seymour's-Exakta to the rescue! We left no stone unturned to obtain this great lens in Exakta mount, and here it is:

28mm F2.8 Fully Automatic Auto-Soligor Wide Angle Lens for the Exakta

Seymour-priced at an unbelievably low \$59.50 + 1.25 Shipping.

What does "Toshiba" mean to you?

You may have seen the name Toshiba on an imported television set. If you are a research scientist you may have seen it on an Electron Microscope. But if you have been to Japan, you know that Toshiba is the "General Electric" of Japan, one of the world's largest manufacturers of electric and electronic equipment from Transistor Radios to Military Radar Systems. Pronounce it TOE-shee-bah, stressing the "TOE".

Toshiba has just come out with a new Cadmium Sulfide (CdS) Exposure Meter, the brain child of a giant company, the PE-1.

The world's film manufacturers will run out of film speeds before the PE-1 will: ASA 6 to ASA 6400! Your camera will run out of F stops before the PE-1 will: F/1 to F/32! And try to match its range of speeds: 8 minutes (not seconds) to 1/8000 sec.! Really easy to use: "One Touch" Operation! And you hardly know you are carrying it: just 3 1/2 ounces! And most important: regardless of price, the Toshiba PE-1 is the most accurate meter in our stock.

Why do we tell you all about this meter which sells for less than \$20 when we have been doing quite well, thank you, selling other meters for over \$50.00? Sure, we like to sell high-priced equipment with a healthy mark-up. But — when we like a piece of equipment, we say so. True, we cannot make \$20 on the Toshiba PE-1 because we sell it for \$16.95. But it's such a fine meter that it would not be fair to our customers to hide it. We know it's good. It is your best investment in picture quality. Buy it!

Toshiba PE-1 Ultra Sensitive CdS Meter, Seymour-priced at \$16.95 plus 95¢ postage, and with every meter we will give you the tiny battery and the case free. No matter how many meters you now have, order the Toshiba — on our recommendation!

A New Crop of Guaranteed SEYMOUR-REBUILT EXAKTAS

You may want a second Exakta for yourself, either as a "spare" or to carry two different types of film. Or you may want to start off a younger member of your family on the way to Single Lens Reflex photography. The Lady of the House may want her own camera. Why settle for a cheaply made inexpensive new camera when you can get a reliable, fully Seymour-rebuilt Exakta for the same price?

Otto is busy supervising the rebuilding of these cameras. Please select the camera best suited to your needs and give a second choice. Order your Seymour-Rebuilt Exakta right now because stocks are ample and you will get a fine Otto-pampered specimen.

Seymour-Rebuilt, Fully Guaranteed:

Exakta VXIIB, Body \$49.50
Exakta VXIIa, Body \$42.50
Exakta VX, Body \$34.50
Exakta V, Body \$29.50

Shipping: \$1.95 per camera

Seymour's Inst-A-Dapters

At last there is a solution to a vexing problem: How to use custom screw-in accessories on lenses with DIFFERENT threads. Most Exakta Owners have a good selection of 49mm Accessories because many Exakta Lenses have a front thread of 49mm. What happens when you buy a lens with, say, a 54mm thread? No need to buy all new accessories: Seymour's new Inst-A-Dapters will let you use your 49mm Accessories on your new lens with 54mm front thread. Seymour's Inst-A-Dapters are of special ultra-thin construction to eliminate vignetting. Order any combination shown below:

Model No.	Has Male Thread:	Has Female Thread:

Filter Sale

Until last year we sold our Series VII Filters for \$5.95 each. About a year ago we dropped the price to \$4.50. The increased volume encouraged us to make larger commitments which led to better prices from the factory. Now we decided to shave the prices down to an irreducible minimum to make it possible for everybody (and we mean EVERYBODY!) to stock up on all the filters he wants. Look at this price:

Series VII coated
Filters in sets of 4, each **3⁴⁹** (Singly 3.95)
