

From stars to starlets. Exakta...world's most versatile camera.

At 3 a.m. in a lonely Canadian observatory, Exakta, adapted for astrophotography, records the path of a new meteor.

While on a sunny Malibu beach in California it captures the expectant smile of a rising starlet.

Outside an apartment house in Buenos Aires, it photographs a close-up of a man's shoe print in the mud.

In a Warsaw hospital, attached to an endo-

scope, it records cholesterol deposits in an aorta.

Exakta, with a fabulous choice of accessories, is the world's most complete system of photography.

See the new VX1000 and

the Exakta 500, now with instant return mirrors, at your Exakta dealer.
