Zeiss Triostar [*offered by Pittsburg Camera Exchange 2381 transactions on eBay!!!*]

GERMAN EXAKTA VATEX GERMAN CAMERA

VINTAGE EXAKTA MAUNAL FROM 1960

EXACTA VX W/ ANGENILEUX

*For sale:* Carl Ziess Jena Biotar 56mm Lens 1:2 f=5,8cm

*My question to seller:* What mathematical trick did you use to convert 5,8cm into 56mm?

*The answer:* The owner told me that was the MM if it is wrong tell me and I can change it before it has bid.

*My reaction:* 5,8 cm is IDENTICAL to 58 mm. The pictures you have sent me show that this is indeed a 5,8 cm lens. Change 56mm into 58mm and it's alright.

*Final message:* Thank you for clearing that up for me, I know nothing about these things, I use digital.

Voitlander Zoomar 36-82mm f2.8 Exakta Mount

Exakta 58mm f2 Zeiss BOITAR

*My questions:* Is the lens name Telemegor or Tele Megor?

Are both focal length measures (6 inch and 150mm) on the lens or only one?

Which one?

What is the serial number?

*The answer:* the first is the american measurement and the second os the european

Prissum is removable & has a rangefinder type viewing port as well as the SLR capeability.
